Announcements

The Technology Community Association will hold an open meeting on Tuesday, September 15 at 7:30pm. We'll be discussing Blood Drives, HoToGaam, The Bus, Freshman Picturebooks, Book Exchanges, and more.

The MIT Women's League is having their annual plant sale on Thursday, October 1 at 9am on the steps of the Student Center.

Lectures

Jean Jackson, Professor of Anthropology at MIT, will speak on “The Evolution of Women's Roles: What the Past can Tell Us” on September 17 at 4pm in the Cheney Room, 3-310. Refreshments will be served.

Off Campus

The Massachusetts Public Health Association is sponsoring a conference, “Genetic Engineering and Public Health” on Friday, September 25, 8:15am - 4:30pm at the Department of Transportation Building in Kendall Square, Cambridge. The purpose of the conference is to raise important public health issues that communities in Massachusetts might face as genetic engineering becomes a larger industry. A draft of a model ordinance for adoption by local cities and towns will be circulated and discussed.

Amnesty International at MIT will hold a meeting on Wednesday, September 16, at 8 pm Room 10-200. All are welcome.

If you're not already examining your breasts because you don't know how, any doctor or qualified nurse will be glad to help you. Breast self-examination is a gentle art of self-defense. It takes only a few minutes a month. It's simpler and faster than putting on your eye make-up. And certainly more important.

Take your life in your own hands.

WORK YOUR WAY TO THE BOTTOM.

... and others, as well as finding new sources of oil and natural gas.

Gulf people: energy for tomorrow.

When you work for Gulf, you could find yourself:

drilling for oil at the bottom of the ocean
or refining coal that lies in seams so deep and slender, conventional mining techniques can't get it out of the ground.

Because the bottom line in energy exploration means we have to search for all sorts of energy. In strange, difficult places all over the world.

We need people with talent, skill, and imagination to join in the search.

To explore energy alternatives such as coal liquefaction, oil shale, tar sands, nuclear power.

While taking care not to disturb the natural balance of the environment.

So we send graduates from many areas, especially from the scientific-technical disciplines.

If you'd like to get to the bottom with us, we'd like to hear from you.
