**YOUR NAME IN LIGHTS**

is but one of the benefits of writing for the Tech Arts Department.

Pop by for pizza Monday evenings during IAP and ask for Dave. Write for The Tech.

---

**The Texas Instruments Home Computer.**

It's a whole new way to learn.

Having your own computer can open a whole new world for you. Whatever your chosen field, you'll find the Texas Instruments Home Computer a powerful tool for analysis, problem solving, record keeping, decision making, research, and more. And the power it places in your hands can be put to work quickly and easily.

**Broad choice of software**

Pre-programmed Solid State Software™ Command Modules — based on the same concept proven in TI's programmable calculators and containing up to 30k bytes of read-only memory — simply snap into place and you're ready to go. There are more than 40 of them. And over 400 more programs are available in cassette and diskette formats. There's a broad and fast-growing choice in the areas of engineering, science, business, art, self-improvement ... and entertainment.

**Powerful programming capability**

For your own programming, you'll find TI BASIC is a rich and versatile language. It's powerful, yet easy to learn and use. What's more, it's built right into the Texas Instruments Home Computer. Random-access memory supplied is 16k bytes expandable to 48k bytes. There's an excellent, type-writer-style, full-travel keyboard with overlays for second functions. Sixteen colors are available and sound through five octaves — 110 Hz to beyond 40,000 Hz — with capability for three simultaneous tones. At the heart of it all: a 9600-family, 16-bit microprocessor.

Optional accessories — including speech!

With the Solid State Speech™ Synthesizer accessory, you can add electronic speech — more than 670 English words. Use it with the Terminal Emulator II Command Module and TI's phoneme stringing technique delivers a virtually unlimited vocabulary. Other optional accessories include Memory Expansion (32K bytes of RAM), Disk Memory Drive and Controller, Telephone Coupler (MODEM), Solid State Printer, RS232 Interface, Wired Remote Controllers, 10-inch Color Monitor, and a Video Modulator.

Campus and you'll find the TI-99/4A Home Computer gives you more for your money, feature for feature. And, if you have a television receiver, you can start for less than $600! See your dealer today for a demonstration.

Texas Instruments invented the integrated circuit, microprocessor and microcomputer. Being first is our tradition.
