On the whole, Walsh was quite pleased with his team's performance this year, and he optimistically looks forward both to sending Shull to the nationals and to having an even better squad next year. "We're young and aggressive," he says. "If we get three more wrestlers, we're gonna be rotted."

Texas Instruments invented the integrated circuit, microprocessor and microcomputer. Being first is our tradition.

The Texas Instruments Home Computer.

It's a whole new way to learn.

Having your own computer can open a whole new world for you. Whatever your chosen field, you'll find the Texas Instruments Home Computer a powerful tool for analysis, problem solving, record keeping, decision making, research, and more. And the power it places in your hands can be put to work quickly and easily.

Broad choice of software

Pre-programmed Solid State Software" Command Modules — based on the same concept proven in TI's programmable calculators and containing up to 30k bytes of read-only memory — simply snap into place and you're ready to go. There are more than 40 of them. And over 400 more programs are available in cassette and diskette formats. There's a broad and fast-growing choice in the areas of engineering, science, business, art, self-improvement ... and entertainment.

Powerful programming capability

For your own programming, you'll find TI BASIC a rich and versatile language. It's powerful, yet easy to learn and use. What's more, it's built right into the Texas Instruments Home Computer. Random-access memory supplied is 16k bytes (expandable to 48k bytes). There's an excellent, type-writer-style, full-travel keyboard with overlays for second functions. Sixteen colors are available and sound through five octaves — 110 Hz to beyond 40,000 Hz — with capability for three simultaneous tones. At the heart of it all: a 9900-family, 16-bit microprocessor.

Optional accessories — including speech!

With the Solid State Speech" Synthesizer accessory, you can add electronic speech — more than 350 English words. Use it with the Terminal Emulator II Command Module and TI's phoneme stringing technique delivers a virtually unlimited vocabulary. Other optional accessories include Memory Expansion (12k bytes of RAM), Disk Memory Drive and Controller, Telephone Coupler (MODEM), Solid State Printer, RS232 Interface, Wired Remote Controllers, 16-inch Color Monitor, and a Video Modulator.

Compare and you'll find the TI-99/4A Home Computer gives you more for your money, feature for feature. And, if you have a television receiver, you can get started for less than $300! See your dealer today for a demonstration.

PREGNANT? Warm, loving couple in existence seeking to adopt infant of co- ed to share their love, their lives. Will pay all expenses. Please contact us Suite 306. Box 54. 1430 Mass. Ave., Cambridge, MA 02139.

SELLING TWO PANAM "2 for 1" COUPONS. Family member has free! Good for Germany, Puerto Rico, Mexico, Guatemala, and many other destinations. Valid Feb. 5 through June 1, 1982. Call 666-3541 or write for ordering information.

WANTED!

GERMAN PROGRAMMERS
(or those who read German)
1. Native English or German speakers
2. Who learned computing and data processing in a native language
3. Good, clear writers of that language
4. Able to translate documents to or from German (not necessary both ways)
5. Call Lee Buechame at 666-7023.

Able to translate documents to or from German (not necessarily both ways)
666-5541 until midnight.

COUPONS. Family member flies free!

By Rich Ausche

Last Saturday in Rockwell Cage, the MIT wrestling team placed seventh in the New England Championships. Coast Guard Academy (102.75) edged Wesleyan (101.25) and Western New England (98) for the title.

More importantly, six MIT wrestlers placed in their respective weight classes. Ken Shull '84 remained undefeated (13-0) as he captured the title at 134 pounds. Shull's victory enables him to compete in the Division III National Championships at Cortland State, New York, February 26 and 27.

In an exceptionally strong effort, Frank Montenegro '85 placed third at 150 pounds. Coaches and spectators affirmed Montenegro's past claim that Montenegro was "the surprise of the tournament." He wrestled like an animal — a man possessed," said Walsh enthusiastically.

Steve Leibiger '83 and Frank Montenegro took fourth place in the 190 pound weight class. This was the third tournament this year in which Fawcett has placed — another "pleasant surprise," said Walsh. Finally, Steve Leibiger '83 and Pui Peters '85 each placed sixth at 167 and 177 pounds, respectively.

On the whole, Walsh was quite pleased with his team's performance this year, and he optimistically looks forward both to sending Shull to the nationals and to having an even better squad next year. "We're young and aggressive," he says. "If we get three more wrestlers, we're gonna be rotted."

An MIT wrestler prepares to lock horns in action at the NECCWA championships.
