1982 Graduates . . .
... Would you consider a career in chiropractic??
... possibly because of the following . . .

1. Chiropractors offer an approach to health care based on an individual's relationship to his environment and the idea that a significant amount of physical well-being is determined by the central nervous system and interference with it by derangements or dysfunctions of the musculo-skeletal system — particularly those of the spine.

2. "From the best figures available to me I would suspect that over 20 million Americans today could be spared suffering and be returned to normal pain-free life were manipulation therapy as readily available to them as empirical non-specific drug treatment is."

3. "The Commission has found it established beyond any reasonable degree of doubt that chiropractors have a more thorough training in spinal mechanics and spinal manual therapy than any other health professional." Report, Royal Commission to Study Chiropractic in New Zealand. (October 1979).

4. "Career Prospects are bright. With 23,000 chiropractors already practicing, the Health and Human Services Study predicts that the 10,000 to 13,000 people who enter the field during the next five years will be easily absorbed.

The study portrays the average chiropractic doctor as a white male in solo practice working in a small town in the Midwest or California and grossing approximately $50,000 per year. With the new public attitudes and an interest in the boy in recruiting minorities and women, this profile soon may be obsolete."

Joyce Lain Kennedy
Job Maris.
Chicago Sun-Times.
November 24, 1980.

5. "It is hoped that the new A.M.A. provision will help to improve the public's conception of chiropractic and improve the utilization of its services with respect to the treatment of muscle, bone, joint and related conditions."

Lowell Stein, M.D.
Chairman. Board of Trustees.
American Medical Association
The Arizona Republic
August 3, 1980.

OR MAYBE YOU SHOULD CONSIDER A CAREER IN CHIROPRACTIC BECAUSE:

1. You wish to utilize your education to serve humanity.

2. The profession needs a steady supply of highly intelligent and altruistically motivated students to fill the increasing demand for: a. Field Practitioners. b. Researchers. c. Faculty Positions.

3. The chiropractic doctoral program includes a four year postgraduate program of basic sciences such as anatomy, physiology, chemistry and pathology, as well as the clinical sciences of physical and laboratory diagnosis, x-ray and chiropractic procedures, both theoretical and applied. Prefer applicants with bachelor degrees.

Palmer College of Chiropractic
Accredited by the
Council on Chiropractic Education
