Minority applicants hosted

A presentation was given on Saturday by representatives of the Association of Puerto Rican Students, the National Society of Black Engineers, the Black Student Union, the National Society of Black Engineers, the Office of Minority Education. The main theme of the presentation was the cultural and academic support minority students could expect if they attended MIT.

Neil Hackett of Yuleon, Pennsylvania, found the events informative, but similar to events held at other universities. "They're all pretty much the same," he said, noting RPS had a similar event the next weekend.

Unlike women, the percentage of minority students at MIT has leveled off in recent years, according to Armstrong. "I wish there was a scientific way to do it," Calton decided last Monday to send students home since he decided the Institute should never close.

"Background, race and sex can be a factor, but just a factor. I don't know if you can put a specific weight on that."
