Biology department seeks Holt memorial lecture

By Laura Farhie
The lecture will be invited to stay on campus for a number of days to participate in other undergraduate activities and to have formal and informal contact with undergraduate students.

The dean of the MIT Faculty, admissions and career services, and certain alumni from other universities, requested contributions to the memorial lecture fund. People have contributed about $5000 to the fund so far, said Brown. "I would be pleased if we could raise as much as $15 to $20 thousand."

We hope to have a large enough fund to use the income generated by financial investments to bring in a distinguished speaker," said Brown. He estimated a speaker would cost about $1500.

A group of biology undergraduates, supported by the Biology Department, have formed the "Food Preparations" committee, which is working on vending machines, such as the one in the National Science Foundation building. The committee has met with the Department of Food and Nutrition and the Career Planning Office to discuss possible vending machines, such as the one in the National Science Foundation building. The committee has met with the Department of Food and Nutrition and the Career Planning Office to discuss possible options for vending machines.

Glasses: You don't always get what the doctor ordered

By SUSAN V. HANDS

Staff Writer

Getting the right eyeglasses isn't as simple as many consumers think. Eyeglass manufacturing is intricate, but you don't have to settle for less than the perfect pair.

The Herald American took a doctor's prescription for nearsightedness and astigmatism and ordered identical glasses from eight Boston-area opticians. When the doctor, George Garcia of the Massachusetts Eye and Ear Infirmary, checked the glasses he found:

- No two pairs were the same.
- One pair matched the prescription perfectly, although four others fell within acceptable limits.
- Two pairs were far too strong.
- vegetables.)
- "We hope to have a large enough fund to use the income generated by financial investments to bring in a distinguished speaker," said Brown. He estimated a speaker would cost about $1500.
