We think your pictures are too important to be ground out at the rate of 10,000 an hour! Don't you?

When you bring your roll of color print film into a drugstore or camera store, it will probably be printed on a high-speed "automatic" printer that operates at speeds of up to 14,000 prints an hour! That's good for the film lab, but not so good for your pictures.

At PHOTOQUICK/CAMBRIDGE, we know that a machine simply cannot do as good a job printing your pictures as a well-trained person who takes pride in his work. That's why here at Photquick, we inspect each and every negative before it's printed, and we make corrections for color balance and density... corrections that probably won't be made by high-speed automatic equipment.

Bring in your next roll of color print film to PHOTOQUICK/CAMBRIDGE by 10 AM. You'll get your pictures back the same day, and they'll look their very best!
