World

Lebanese army takes control of camps: peacekeeping force returns to Beirut — Lebanese army troops moved into Palestinian refugee camps in Southern Lebanon this week in the wake of mass evacuations of Palestinian civilians by Lebanese Christian militia. US President Ronald W. Reagan announced last evening American Marines will join French and Italian troops returning to maintain peace in West Beirut. While the Lebanese army began the task of removing the bodies of hundreds of victims from the Shatila and Sabra camps, Israel’s Labor Party, several Israeli newspapers, and hundreds of Israeli demonstrators called for the resignations of Prime Minister Menachem Begin and Defense Minister Ariel Sharon. The Israeli government admitted allowing Phalangists into the refugee camps to search for guerrillas, but denied responsibility for the massacre.

Nation

Engineers' contract talks derailed — A strike by 26,000 railroad engineers continues to disrupt train service throughout most of the United States. The engineers are seeking pay increases to maintain their traditional position as the highest-paid members of a train’s crew. Only rail service operated by Conrail — including Amtrak intercity passenger service in the northeast corridor — is presently unaffected by the strike.

Sports

Pro football season sacked on fourth down — The NFL Players Association executive committee voted 9-0 yesterday to interrupt the professional football season with a strike against team owners. The play-

Weather

A series of weak storms making its way up the coast and a continuing now of humid air off the Atlantic will keep skies cloudy today and tomorrow. Periods of rain and drizzle could break the humid monotony, as well as a chance for showers in the northwest quadrant.

THE HONEYWELL FUTURIST AWARDS COMPETITION

GRAB 2000 BUCKS IF YOU CAN ACE THIS EXAM!

Twenty years ago, who'd have thought you could carry a roomful of computers in your pocket? Make music with numbers? Or push pictures through a glass thread?

Yet today, it's just as difficult to predict what another 20 years will bring. So we're leaving it up to some pretty well qualified individuals. People like you.

We invite you to participate in the Honeywell Futurist Awards Competition. Predict the most significant technological developments in the year 2000 and how they'll affect our environment, economy and social structure. A panel of expert judges will select the ten winners, and Honeywell will give each of those talented students $20000!

And there's a bonus! Those winners with a declared major in electrical engineering, computer engineering, mechanical engineering or computer science will be offered Honeywell Summer Internships — with salary grants!

How to Enter

Mail us the completed request form for your Honeywell Futurist Awards Competition Blue Book and entry instructions. Predict the changes that will occur by the year 2000 in Computers, Energy, Aerospace, Marine Systems, Biomedical Technology, and Economic Communication, and how these changes will reshape the World.

The ten winners will be notified by mail, and invited to the Honeywell Futurist Awards Dinner with the Futurist Panel of judges, February 15, 1983, in Minneapolis.

Eligibility

1. You must be currently enrolled at an accredited U.S. college or university as a full-time undergraduate or graduate student. (full-time faculty members and Honeywell employees and their immediate families are not eligible)

2. Send in the coupon or write to: Honeywell Futurist Awards Competition, P.O. Box 9017, St. Paul, MN 55163. Yes, I am interested in participating in the Competition. Please send me an Official Futurist Blue Book.
