RESEARCH...

With An Emphasis On Challenge

The Washington Research Center is the central research facility of W.R. Grace & Co., a multinational corporation with worldwide interests in chemicals, natural resources (coal, oil, and gas), and selected consumer services. Grace is the world's leading specialty chemical concern and one of the nation's largest chemical companies. Dramatic advances are being made in areas ranging from inorganic, organic, and specialty chemicals to polymers, catalysts, catalytic processes, biochemistry, and electrochemistry.

The Research Center, site of Grace's Research Division and the research activities of the Davison Chemical Division, is located in a well-equipped facility on approximately 150 acres of land in Columbia, Maryland. Our planned community offers quality housing, health care, and recreation facilities, convenient shopping, and excellent educational facilities. Geographically, Columbia is equidistant between Baltimore, Maryland, and Washington, D.C., with ready access to extensive cultural and entertainment activities.

If you have a Ph.D., or are graduating from a Ph.D. program in chemistry, biochemistry, or chemical engineering and are interested in the research activities of Grace, meet with us when our representatives visit your campus on Wednesday, October 27, 1982.
