You may know us.

We're the people who provide information and answers for virtually every facet of the world's needs.

We're Computer Sciences Corporation.

If your talents, skills and education encompass the computer software, hardware or communications technologies, you should get to know us better. CSC is the information corporation. Our computer programmers, engineering computer analysts, mathematicians, scientists, physicists and financial/economic analysts conceptualize, design, write and implement some of the most sophisticated communications networks on Earth. We design business systems for corporate America. We program the communications systems for some of the country's largest metropolitan transit lines. We provide the data processing systems for large industries as well as entire countries. We're an intricate part of the nation's defense program. And we handle equally awesome challenges in space. As the computing partner to NASA, we programmed and developed the launch vehicle for the Space Shuttle and designed its global communications network. We'll also create the software and hardware for man's first telescope in space. We're Computer Sciences Corporation.

We'll be on campus
