**ADD TEN YEARS TO YOUR THINKING.**

The environment at MITRE is years ahead of what others consider the state-of-the-art.

As General Systems Engineer for C3I—Command, Control, Communications and Intelligence—for the U.S. Air Force's Electronic Systems Division, it is our challenge to look beyond tomorrow to the world of 5 or 10 years from now. To analyze and engineer one-of-a-kind systems that will be more than current well into the 1990s.

The importance of our work is why we provide an environment you can do your best in. You'll work with some of the most accomplished experts in their fields.

You will be challenged by long- and short-term projects in computer systems, systems software, systems architecture, radar systems, and satellite and terrestrial transmission. Engineers you'll be working with can advance your career a decade in technologies including fiber-optics, computer security, sensor technology and voice recognition.

Your excellence is nurtured in every way possible at MITRE. Facilities, compensation and benefits to attract and keep the finest people. Full tuition advancement plus an ongoing in-house lecture series from the unique MITRE Institute to promote your continued education. Plus exceptional project mobility and dual career pathing to get you where you want to be, doing what you do best.

If you would like 10 more years' wisdom—without the wrinkles—come to MITRE. We've got the environment for it.
