Avert holocaust!

As members of the staff, faculty, and student body of MIT we share the concern of most Americans over the accelerating nuclear arms race between the two superpowers and the increasing danger from nuclear weapons in the hands of other governments.

We hereby urge all members of Congress to move toward reducing the risk of nuclear war, and toward the eventual elimination of nuclear weapons. By accepting and implementing the following proposals:

1. The United States and the Soviet Union and other nations, and subject to appropriate verification, first, a manual moratorium on the testing, production, and deployment of nuclear weapons; and secondly; we attempt designed primarily to deliver nuclear weapons; and following that, a subsequent moratorium on the production of nuclear weapons.
