The ultimate Competitor

By Jean Fiermaurice

Tomorrow the team will be away to take on Nichols. The next home game is scheduled for Thursday against Wheaton at 7pm.

In 1947, a man flew the Flying Boat, "Hercules" – the largest airplane in the world.

The man was Howard Robard Hughes.

His ingenious ideas and explorations brought new discoveries in aerodynamics, communications, avionics, electronics...

And the early years of Hughes Aircraft Company.

Today, Hughes no longer builds airplanes but the discoveries and exploration of ideas continue.

The company's long history of technological firsts, including the first working laser, the first jet engine, and the first synchronous-orbit spacecraft, position Hughes as a world leader in today's electronics industry.

Company-wide opportunities:
- Electrical, Mechanical, Manufacturing or Industrial Engineering
- Materials
- Computer Science & Physics
- Industrial/Electronic Technology

Requirements may vary. Check with your placement office for more details.

Hughes Story.

Today Hughes Aircraft Company is creating a new world with electronics.

Beverly Yates '83 puts up a shot against Anna Maria.

Women's basketball defeats Anna Maria

By Jean Fiermaurice

The Tech's basketball team scored an impressive 54-29 victory over Anna Maria Tuesday night in Rockwell Cage. Their record now moves to 7-6, with four victories in the last six games.

Both teams started the game slowly. MIT broke out ahead 11-2, taking advantage of numerous turnovers by Anna Maria. Three straight baskets closed the gap to 13-15, but great shooting from captain Terry Felts '84 and Cindy Robinson '84 ended off the half at 34-14. Their largest margin was 20, with MIT riding to move ahead by 20, 11-10, but with the yellow team in the game plan, as it had problems with turnovers and poor shooting throughout the night.

High scorers for MIT were captain Terry Felts '84 with 15 points and Cindy Robinson '84 with 12. In addition, every MIT player who went into the game scored.

With six games remaining (the Tech's last four), it's all been business. Even when the MIT house team has been losing, they've created excitement or covered up. So during the season, they kept taking new ideas and new techniques, and now they're ready for anything. Their last two games were both scheduled for weekends against teams with good shooters, so they're ready for anything.

Hughes Aircraft Company. 292 Boylston Street, Boston, Massachusetts 02116. Phone: (617) 426-8000. Telex: 110018.6
