Corporations okays tuition

By Bert S. Kaliski

The MIT Corporation Friday evening approved the 7.5 percent increase in equity level and 10.3 percent increase in tuition proposed by President Paul E. Gray '54 for the 1983-84 academic year.

The tuition increase — from $7870 to $8690 — is not the largest among top colleges in the nation, a survey conducted by The Tech found last week.

Wellesley College students face a 15.1 percent increase in tuition, from $7340 to $8550, according to the college's admissions office, although room and board expenses will drop from $3460 to $3300.

Tuition at the University of Chicago will rise by 14.3 percent, from $7000 to $7935. Tufts University will see an increase of 11.6 percent, from $7600 to $8334.

Ivy league schools will see increases of 10 to 13 percent. Harvard University's tuition will rise from $8195 to $9035, or 10.3 percent. The school's room and board costs will jump by 25.3 percent — the highest among those surveyed — from $3280 to $4115, according to the Harvard admissions office.

Princeton University's tuition will jump by 12.3 percent — from $8410 to $9450 — and Dartmouth College students will bear an 11 percent hike — from $8190 to $9090 — for three academic quarters.

Tuition at Brown University will increase by 11.5 percent, from $2570 to $2920.

The University of Pennsylvania has not set figures, but its admissions office predicted a tuition increase of about 10 percent.

Columbia University has also yet not announced a tuition hike, but the admissions office there estimated a large rate in total student budget, from $11,444 to approximately $14,000, or over 20 percent.

Tuition at Stanford University will rise by 9.8 percent, from $3920 to $4307. Its admissions office also estimated a total budget of $14,000 for the coming academic year.

Northeastern University tuition will increase from $8085 to $8995 — a change of 9.9 percent. The university's total costs will jump from $12,330 to $13,400, or 8.9 percent increase.

Rice University announced the smallest increase of colleges surveyed, 5.7 percent, from $7500 to $7950.

The Nuclear PoliTechnic Institute's tuition will increase by 10.1 percent, from $7440 to $8330.

The University of Texas at Austin, also announced a tuition increase or colleges surveyed, jumping 7.3 percent, from $7000 to $7500.

"Unfettered, unconstrained re- search," said Detournay. The Department of State has sent 14 letters to MIT since Sep- tember requesting information on students of mainland Chinese ori- gin who now do research at MIT. (Please turn to page 10)

Committee reports on research, security

By Will Doherty

(Editor's note: This article is the first in a series, running through the year at MIT.)

An internal report released today by the MIT Committee on the Changing Nature of Information recommends MIT policy in response to government attempts to control university research in cryptography and very large scale integration (VLSI).

The report also reviews the participation of foreign scholars in such university research activities.

The MIT Laboratory for Computer Science (LCS) now forwards all research papers on cryptography to the National Security Agency (NSA) for review at the same time these papers are distributed for peer review, according to Professor Michael L. Dertouzos '64, director of LCS. Dertouzos is chairman of the President's Commission on the Changing Nature of Information.

"The notification process, established in meetings between university and NSA officials five years ago, does not inhibit MIT's research," Dertouzos said.

"...unfettered, unconstrained re- search," said Detournay. The Department of State has sent 14 letters to MIT since Sep- tember requesting information on students of mainland Chinese ori- gin who now do research at MIT. (Please turn to page 10)
