Witt elected to lead Undergraduate Association

(Continued from page 1)

Witt said at a campus forum last winter that the group needs to deal with the MIT administrative structure, and that the Undergraduate Association can be divided into committees to "get things done." He does not want to waste time on the General Assembly if it is not showing out, Witt added.

Witt and Gede will be in contact with Steven D. Immonen, assistant dean for student affairs, to work out ideas for restructur- ing the Undergraduate Education Committee. Witt said. He suggested the board be composed of representatives of student organizations.

Treasurers of the Black Student Union, the Association of Student Activities, the Student Committee on Educational Policy, the Leasure Series Committee, and the Tech should become members of the restructuring Finance Board, he suggested.

The Finance Board should be separate from the Office of the Dean for Student Affairs, he continued. "Students should have a say in where their money goes," he added.

Need-blind admissions is "real- ly important," Witt said. He plans to work to ensure the poli- cy continues. He added he favors MIT's decision to provide loans to students who are denied federal and by registered to refer to the draft.

The solution to the problem of high education costs is to cut back programs, although in- creased tuition may be necessary. "It's not necessary to come up with solutions... but they should have a say in what is cut and what is not." Students pay only $80 million in tuitions and fees, but MIT's academic budget is $150 million. Witt pointed out. He said building new facilities when the Institu- tion operating at a deficit is a sign of waste.

A student activities for may be may be necessary if the Office of the Dean for Student Affairs were to cut funding for the Undergraduate Association, Witt said, but added he opposes such a fee. Committees such as the Student Center Committee and the League of Unstructured Committees are not required to be given funds to the student government, he said.

The Office of the Dean for Student Affairs should provide a fixed amount of support for student activities, one which can not be reduced, Witt continued. "I don't want to put a lot of money into student activities," he said. He would like other committees to work on the projects. He supports a move for a shuttle bus, a newsletter and an undergraduate club. He encourages the other candi- dates to become involved in the projects.

Developing A Social Conscience

By Ben. Michael McFall, of the Pilot Office

"Think of the starving children in China and eat that food on your plate," our parents told us. "Don't waste it," they insisted. But what if that food is from a university that now brings its own food from the third world, where children have no food at all? What if that university is MIT?

"The free exchange of ideas..." Witt testified before the sub- committee of the House Judiciary Committee on behalf of the Asso- ciation of American Universities and the American Council on Education.

"The most important thing MIT can do is to teach students that they are in- volved in a global community," he said.

This is the key to understanding MIT's decision to provide loans to students who are denied federal and by registered to refer to the draft.
