World

Israel continues partial pullout from Lebanon. — The Israeli army has withdrawn from its positions in the Shuf Mountains overlooking Beirut, apparently abandoning its attempt to make Syrian and PLO forces leave Lebanon. Heavy fighting between Christians and Druze erupted in the capital yesterday as both sides scrambled for positions evacuated hours earlier by Israeli troops.

Amy S. Gorin

Sports

How do the Patriots Fumble; let us count the ways. — The New England Patriots fumbled four times and missed two field goals, en route to a 29-23 opening day loss to the Baltimore Colts, who have consistently lost to everyone but the Patsies since November 1980.

Robert E. Malechman

Weather

Orientation, no sweat: the weather, well . . . — The balmy, hot and humid weather continues today, with a high around the record of 92 degrees set in 1980. A sticky night follows, with temperatures in the low to middle 70s. Cloudy tomorrow, with a chance of afternoon thunderstorms, but a high still around 90.

Orientation DANCE

Friday, September 9, 1983
9:00pm
Faculty Lounge

All Graduate Sloan School Students

Welcome

E52 6th Floor

Off-Campus

Students with visual problems are invited to an exhibition sponsored by the Massachusetts Association for the Blind on September 20 from noon to 7pm to learn about services and equipment that make life easier for people who are visually impaired. There is no admission charge. Talking clocks and computers, paperless braille, talking books and large screen computers are a few pieces of equipment being displayed. Representatives from agencies providing services — job training, recreation, transportation, recordings, volunteers, information, and everything else one needs to know — will be able to talk about their programs. Braille watches can be repaired.

The exhibition will be in the Dorothy Quincy Suite, John Hancock, corner of Hancock and Berkeley Streets. Boston — two blocks from the Arlington Street stop on the Green Line. For more information call Pat Allyn at 736-5110.

Eucharist at 5:10 pm

Boulevard of Champions Building 312 Memorial Drive Supper follows

Wednesday, Sept. 7 5:10 pm

Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions — more functions than a simple slide-rule calculator has. Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because its preprogrammed to perform complex calculations — like definite integrals, linear regression and hyperbolics — at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula. Included is the Calculator Decision-Making Sourcebook. It makes the process of using the TI-55-II even simpler, and shows you how to use all the power of the calculator. Get to the answers faster. Let a TI-55-II show you how.
