**The Company**

Megatest builds the finest LSI testers in the world. Our systems test more microprocessors, EPROMs and Bubble Memories than anybody else's. They have broken all industry records for reliability. They have altered the way people think about device testing.

We've attained this standing in the industry while remaining a small, friendly, employee-owned company. How? By creating an environment that rewards creativity, effort and results, not politicking, rank or tradition. And by emphasizing neat ideas more than neat desks and neat dress.

**The Job**

We are now designing new test systems which will handle the "super-chips" of the future. These systems will require astoundingly powerful computers and near-perfect analog support circuitry. They will be specified in terms of picoseconds, nanoamps and gigabits.

We need people with as much potential as our new systems in the following areas:

- **Computer Scientists** (language processors, interactive development tools)
- **Analog and Digital Engineers** (high-speed ECL gate arrays and hybrids)
- **Marketing Engineers** (combines technical and marketing skills)

**The Potential**

The range of professional opportunities at Megatest is almost unlimited and we've perfected a management style that makes it possible to move freely among them. You follow your instincts and ambitions. If you've got potential you can unleash it at Megatest.

Drop by. We'll be on campus — Friday October 21 and Monday October 24, at the Career Planning and Placement Center.
