
Do you still look for that comic strip in your morning newspaper despite its almost year-long absence? Do you despair of surviving without its acerbic witticisms? Take heart: A new chapter has been written in the Doonesbury saga.

Garry Trudeau announced last summer he would take a 20-month sabbatical from his Pulitzer-Prize-winning comic strip to write a musical comedy featuring his characters and their backgrounds - he has written surprising changes into an already unpredictable microcosm.

Doonesbury begins with the residents of Walden commune preparing for the ultimate indignity: commencement day. Tomorrow they will be forced from their protective womb into the harsh reality of the outside world. Even Zonker, who has managed to save several sheep from untimely deaths, cannot escape his certain fate. Mike is planning to "go the B-School route"; B.D. has been drafted by the Dallas Cowboys.

Boopie, aspiring to a position on the famous cheerleading squad, plans to follow B.D. to Dallas — a career move meant to serve as a stepping stone to her true calling as a Hollywood actress. Mark and Zonker are sure of their plans: They don't have any. Zonker tells everyone his fanning career is over, but his plants convince him otherwise, so off comes the shirt and on goes the official George Hamilton tanning butter.

In addition to his B-School aspirations, Mike harbors a secret: He plans to ask Joanie Cauciu's semi-stranged daughter, J.J., to marry him. He has carefully scripted his planned proposal and prepared a minute-by-minute schedule for the impending Commencement weekend.

Joanie stops by Walden with her baby to pay her respects to the graduates; Compact Discs move with the minute-by-minute schedule for the impending Commencement weekend.

If you've always looked for what's around the corner rather than what is straight ahead, consider a career with Linkabit. Linkabit didn't get to where it is today by way of tunnel vision. We're a leader in the design, development and manufacture of satellite and terrestrial communications equipment, specializing in local communication networks, encryption, forward error correction and high speed modulation. Our people are very creative, free thinking individuals who look beyond obvious solutions to find advanced, innovative ways to meet the demanding needs of this industry.

We’re looking for people who don’t think straight.

If you’ve always looked for what’s around the corner rather than what is straight ahead, consider a career with Linkabit. Linkabit didn’t get to where it is today by way of tunnel vision. We’re a leader in the design, development and manufacture of satellite and terrestrial communications equipment, specializing in local communication networks, encryption, forward error correction and high speed modulation. Our people are very creative, free thinking individuals who look beyond obvious solutions to find advanced, innovative ways to meet the demanding needs of this industry.

To help keep new ideas flowing, we’ve made sure that all career paths are flexible. Our engineers, for instance, are assigned to projects depending on their interests and abilities. As one assignment is completed, new opportunities are made available in a variety of areas.

Because our projects are very diverse and complex, we utilize the most advanced equipment available. And our staff is comprised of professionals with a wide range of expertise.

Our company is expanding rapidly, and we’re constantly looking for talented people interested in communications systems, digital hardware or software engineering. We have positions available in San Diego, Boston and Washington, D.C.

Company Presentation
Thursday, October 20
4 p.m. - 6 p.m.
Building 4, Room 149

On Campus Interviews
Friday, October 21

Please contact your College Placement Office to arrange an interview appointment. If you are unable to meet with our representatives, please forward your resume with college transcripts to Dennis Vincent, M/A-COM LINKABIT, 3033 Science Park Road, San Diego, CA 92121.
