The Student Center Committee will hold three elections this spring. (See page 50.)

By Daniel Crenan

The Undergraduate Association General Assembly decided to meet Thursday to hold a non-student-wide referendum asking students whether they approve or disapprove of the showing of pornographic movies on campus. The results will dictate General Assembly policy on showing of pornography. The vote requires a simple majority of undergraduate and graduate student voters.

The referendum, if approved, will not prohibit the Lecture Series, the Student Center Committee, the Graduate Student Council and the Undergraduate Association Finance Committee from showing movies open to the public should they wish to do so. The referendum was supported by the Undergraduate Association Finance Committee, the Student Center Committee and the Committee of 1988. The process will apply to freshmen wishing to enter the department in 1989.

The referendum, if approved, would begin with the Class of 1988. The process will apply to freshmen wishing to enter the department in 1989.

The referendum will hold a vote on the matter, "since each individual will have a say in the future of this institution," said Steven H. Richardson '48, president of the student association. "We are concerned with the future of the university as a whole." The referendum was approved by a simple majority of undergraduate and graduate student voters.

The general assembly has not yet thought fully on the question. The committee's proposal is not yet in its final form. The study of space sickness and human sensory adaption to weightlessness is far more complex than it did in the last edition. The committee's proposal is not yet in its final form.
