Columbus VP. Full feature performance in one package

**SPECS:**
Processor: 8088 CPU 16-bit 4.77 MHz socket for 8087 numeric processor.
Memory: EPRIM 12K.
Peripheral Interfaces: RAM 128K/256K (Pipette) PC/825R 250 ns disk controller supporting two high-speed disk drives.
Mass Storage: Floppy disk controller supporting two high-speed disk drives.
Display: 640 x 200 pixels.
Keyboard: IBM-PC compatible.
Parallel Printer Port: Centronics compatible.
Others: Eight level priority interrupt controller. One IBM-PC compatible expansion slot.

**SYSTEM FEATURES:**
Keyboard: IBM-PC compatible.
CRT: Green phosphor, 9" diagonal, non-glare.
Mass Storage: Two high-speed floppy disk drives: 200K bytes per drive.
Physical: Size 18" x 16" x 8" with cover.
DMS controller: 640 x 200 pixels E & W interface: 640 x 200 pixels E & W.

**SPECIFICATIONS:**
- Memory: EPRIM 12K.
- Peripheral Interfaces: RAM 128K/256K (Pipette) PC/825R 250 ns.
- Mass Storage: Floppy disk controller supporting two high-speed disk drives.
- Display: 640 x 200 pixels.
- Keyboard: IBM-PC compatible.
- Parallel Printer Port: Centronics compatible.
- Others: Eight level priority interrupt controller. One IBM-PC compatible expansion slot.

**PROJECT UPDE**

**MANUFACTURING/ FINANCIAL ANALYST**

Develop your technical and problem-solving skills with Varian's Semiconductor Equipment Group - a research, design and manufacturing organization specializing in semiconductor fabrication equipment. As a contributing to our team environment, you'll enjoy the recognition and rewards you deserve. And you'll find plenty of opportunities and encouragement to develop professionally. If you're a motivated innovator, explore the following high visibility opening at Varian SED.

**Reporting to the Director of Manufacturing Operations, you will:**
- Evaluate manufacturing procedures and maintain a high level of financial performance for the department.
- Develop monitoring systems and controls, as well as assist in justifying capital equipment recommendations. Acting as liaison between Manufacturing and Accounting, you'll help generate computer systems design for financial operations. You will also assist in the development of management techniques, develop and assist with financial training for manufacturing personnel.

This key position calls for a clear understanding of accounting practices and financial controls for a high technology manufacturing environment. You should have community with budgets, standards and inventory management for manufacturing systems. Qualified applicants should have solid interpersonal and communications skills. A Bachelor's degree in Industrial Engineering or Engineering Economics is desirable, an MBA is preferred.

Along with unique opportunities for career development, Varian SED offers a site location on beautiful Cape Ann. You can enjoy all the benefits of scenic North Shore living and Boston's cultural resources close by. We are an equal opportunity employer. To explore this position please send your resume to:

Hugh B. McGettigan
