Technology can provide freedom

(Continued from page 8)

Technology ever, since, given the choice, people tend to pick the option that is better, and not worse, for them.

The Orwellian danger in today's world is that people often are not given a choice. With even the best of intentions, attempts to impose one person's decision on another always strengthens the Orwellian forces in the world, and can still hinder the humanizing forces in the world.

Consider the rifles of Eli White-

ning. Using interchangeable parts can turn Eli White's笺

king rifles in large vol-

ues. They were easier to main-

tain than earlier rifles, and easier
to produce. As a result killing be-
came easier, and more bloody. If technology is some-

thing that should be selectively

sharpened, if there is a case

where power over people is justified as a means of stopping certain technologies, then Eli White's rifles would have been prime candidates for banning. Yet interchangeable parts became a cornerstone of modern indus-

try. People have benefited enor-
mously from the increases in ag-

riculture, production, and the fact that Eli White's invention allowed.

In the struggle between the Orwellian forces of politics, and the anti-Orwellian force of tech-

nology, it is important to re-

member the dangers of giving

some power over people. In this 1984 is a stirring book. It man-

ages to capture the horror of tu-

talitarian control. The reader sees

the humanity in humanity strug-
gled, and understands that abso-

lute government is a trap that once falls into, we may never escape. As a cautionary tale 1984 remains a classic.

Eating the last meal

(Continued from page 8)

The screams of joy are the sound we hear everywhere, the drone of helicopters hovering over our test. They are the sound we will feel, the sensation of completion — when the nuclear bomb goes off — a perfect hit on the Nerve Gas Factory.

The screams of Pain are not denied, for the inability to let life go by, for all we have been denied, and must then let go of it safely. And someday, the forty thousand screams will serve only as warn-
ings to the future, not as pictures of the future.

Something about 1984:
The most horrifying aspect of 1984 was that they could find out your worst fear, and that's what they would use to torture you, like the case of Winston Wilson's stomach. The most horri-

fying aspect of 1984 is that They knew our worst fear. They knew how we feel when we know that our mother is gone, our father is gone, our children are gone, our lover is gone. We are alone in the desolate and unbreakable Nerve Gas Factory on the corner. This is our worst fear and this is how they will tort-

ure us.

I was both in 1949. In 1948 I will have been tortured for thirty-five years. The only life I have ever known has been lived with the constant sound of the screams of joy. In the last year, I have been to the Nuclear Arsenal and now I live too with the screams of Pain from all over the world. I cannot eat my meal in peace, knowing that I am about to be murdered. Is it a suicide or murder? It is a

Final Word:

There's really nothing you can say about 1984 that you haven't heard already. There's really nothing new that you haven't read about already. If you haven't read about 1984, you're just not paying attention. If you haven't read about 1984, you're just not paying attention. If you haven't read about 1984, you're just not paying attention.

Train With Us and Take a Great Career Home With You.

Chase is now hiring foreign national candidates who are interested in exciting and rewarding careers in their home country as Commercial Lending Officers. If you are seeking tremendous growth with exposure to business and financial expertise to take advantage of this unique opportunity to join our Global Financial Network.

Your career will begin with a 3-6 month period of orientation and on-the-job training at the Chase office in your home country. From there you will be sent to a Chase headquarters in Puerto Rico where you will attend our highly renowned intensive Credit Training Program in financial analysis and lending.

We're interested in hiring with several nationalities from the following countries, who are interested in applying their expertise at home:

Bahamas  Mexico  Puerto Rico  Venezuela
Barbados  Panama  St. Martin  Virgin Islands
Dominican Republic  Paraguay  Uruguay

Interested individuals may contact Lifium Gutiérrez prior to January 30th at Northwestern University, 333 North Michigan Ave., Room 1035, Chicago, IL 60611, to receive a resume and be interviewed.

typewriters to students and staff, at reasonable prices. Located in Building 39, 224 Albany Street. Open Mon., Weds., Fri, 10 am — 1 pm.

The Career Opportunity of a Lifetime

In four short years, computer professionals have mapped the growth of Apollo Computer Inc., from a venture startup to a major industry. The company's work force has grown 17% in the past year alone. Responsible for Apollo's success is DOMAIN, the Distributed Operating Multi-Access Interactive Network work process, which can link hundreds of users on a high speed network. As a computer professional, Apollo aims to design and build superior computer systems. Apollo works on several major computer systems projects simultaneously. Does this sound like a career opportunity? If so, please contact Apollo for more information.

Senior Manufacturing Engineer, Test Support

Responsible for systems level production test support. Individual will participate in the development and implementation of testing systems, test methods, write test processes, assist in technical problem solving, design test equipment, and provide general manufacturing sup-

port. Individual will also participate in writing and developing test processes as well as provide Manufacturing Division liaison to other organiza-

tions. Person will be able to provide direction to lower level engineers and technicians and perform other activities with maximum supervision.

BSEE or equivalent education required with Masters degree a definite plus.
