DO YOU THINK

...today's technology represents only a feeble glimpse into the possible?

We do too! So, join us in probing the frontiers of science and technology with basic and applied research at sophisticated levels.

We are not probing just a few frontiers. Consider these: laser optics; infrared electro-optical systems and fiber optics; microelectronics, semiconductors and semimetallic (IC/HEID circuits; advanced control concepts, artificial intelligence, signal and imaging processing, robotics, CAD/CAM, gas turbine technology, fluid dynamics, combustion, aeromechanics, materials science; VSTOL technology, aeromechanics, applied mechanics; automotive technology, building systems technology, manufacturing technology, NDE, industrial lasers, computer science, digital applications and operating systems.

During the remainder of the decade United Technologies plans to spend an average of $1 billion annually on R & D. Few other U.S. corporations make such substantial investments in their future.

CAMPUS INTERVIEWS — February 27 & 28, 1984

(See your College Placement Office)

If this interview date is inconvenient, please write to Mr. N.T. Marcin at the United Technologies Research Center, Silver Lane, East Hartford, CT 06118.
