Read ye the Book

(Continued from page 7)

III

It came to pass that Job did grow older, despite his many afflic-
tions, and he did graduate for he cursed not the Institute nor
did he transfer, but he discovered a new method for micro-
wave encryption. Thus did Job ascend from graduate school to
post-doc, and even unto professor.

And it came to pass, that the

Gray One '54 waxed old and
waned on as president. So the
Corporation and the faculty
oped to appoint for the Gray One
54 a chancellor. For even when the
Wheezner was enthroned supreme in Technology was the
Gray One '54 chancellor. And lo, the chancellor, named second only to the Gray One '54, was
called Job, yes even our hero.

Thus did Job ascend to the ranks of great ones, as his reward
for not cursing the Institute and

transferring.

Then as the Gray One '54 passed on into the state of being
as an Institute professor emeritus, the Corporation and the fac-
culty did make his chancellor, even Job, to be enthroned in all of
the Gray One's '54 former glo-

ry.

IV

There did J. S. Sauron, lift up
my eyes again, and I saw before me all of the vice presidents and
Institute professors going to and
fro singing the praises unto the

Constantinoplgus saying, "Have thou considered my faithful stu-
dent Jonah? . . ."

Editor's note: Stuart C. Atlow '83 is a graduate student at Bran-
deis University.

It came to pass that Job did
grow older, despite his many af-
fections, and he did graduate for
he cursed not the Institute nor
did he transfer, but rather he dis-
covered a new method for micro-
wave encryption. Thus did Job
ascend from graduate school to
post-doc, and even unto profes-
sor.

And it came to pass, that the

Gray One '54 waxed old and
waned on as president. So the
Corporation and the faculty
oped to appoint for the Gray One
54 a chancellor. For even when the
Wheezner was enthroned supreme in Technology was the
Gray One '54 chancellor. And lo, the chancellor, named second only to the Gray One '54, was
called Job, yes even our hero.

Thus did Job ascend to the ranks of great ones, as his reward
for not cursing the Institute and

transferring.

Then as the Gray One '54 passed on into the state of being
as an Institute professor emeritus, the Corporation and the fac-
culty did make his chancellor, even Job, to be enthroned in all of
the Gray One's '54 former glo-

ry.

E-Systems continues

the tradition of
the world's great problem solvers.

Developing the ana-
lytical theory known by his
name, Joseph Fourier gave
the world a basic tool for

engineering analysis and

system design.

Today, E-Systems

engineers are carrying on
his tradition. They're using
Fourier’s mathematical

accomplishments to solve
some of the world's toughest
electronics problems

via computer-designed
circuitry. E-Systems designs
and produces communications
systems, data systems, anten-
na systems, intelligence and
reconnaissance systems that are often the
first-of-a-kind in the world.

For a reprint of the
Fourier illustration and
information on career op-
portunities with E-Systems
in Texas, Florida, Indiana,
Utah or Virginia, write:
Lloyd K. Lauderdale, VP
Research and Engineering,
E-Systems, Corporate
Headquarters, P.O. Box
