Questions enterprise

To the Editor:
I realize that I am acting a little late and that the party involved was not the brightest, but I hope you will print my story to warn the rest of you too.

A week before finals week last term, my mom received a letter offering a box of goodies to send to her son or daughter. It professed to include healthful nuts and dried fruits, gummy bears, and candy. It also included a special offer and for a couple bucks more, an additional goody was included to make your child extra-smart. The letter admitted to not being recognized by MIT but was signed by "Joan Wilson, '86."

My mom, in her good nature, bought the whole thing with the note that it was "for a couple bucks more, an additional item for smartness." After sending in a check for over $13, the box never came.

I asked around and found that some students here have received such a box, and some have heard of it too. Joan Wilson is not recognized by MIT but was signed by "Joan Wilson, '86."
