Candidates answer queries from the floor in the election forum last night.

Wages cited in tuition hike

By Mark Cacchione

The reason stated by the new Senate in this year's 7.3% tuition hike was increased employee salaries, according to President Paul E. Gray '74. According to Gray, 60 percent of MIT's $600 million annual budget goes to employee salaries, wages and benefits.

The Executive Committee of the MIT Corporation approved the final increase in its regular meeting Thursday.

The rise in tuition from $9,600 to $10,300 next year will be accompanied by an average 5.7 percent increase in the student aid board, from $3380 to $4400.

The annual budget for the Institute is compiled by Provost Francis E. Low and Senior Vice President William R. Dickson '56. The tuition rate is determined based on economic predictions for the academic year it will cover. The tuition, Gray added, must be determined six months before it goes into effect.

Electations for the Ward 5 Democratic Committee in Cambridge on March 13 could influence the city's position on the development of the MIT-owned Simplex site in Cambridge.

The Group 1 slate, which calls itself The Neighborhood Voice, includes three members of the Simplex Steering Committee. It is backed by the committee, which opposes MIT's development of the Simplex site, claiming the plan does not provide enough low-income housing for Cambridge residents.

The incumbent Group 2 slate supports the Caraguans Petition, which was submitted by James W. Caraguans. The petition calls for less low-income housing on the site, in favor of the steering committee's proposal.

Mary Parker, a member of the Group 2 slate and backer of the petition, said most members of the Group 2 slate favor the immediate development of the Simplex site to provide housing, jobs and tax revenue for Cambridge.

"The Group 2 slate also has priority for jobs and housing revenue from the development to go to Cambridge residents," she said.
