Apartheid profits the United States

(Continued from page 11) 

vates the United States with a re-
viable outpost to control the sea-
route between the Indian Ocean
and the Atlantic, a vital link to the
Persian Gulf oil, so coveted
headed for collapse. The waves
world, South African
of the backing it gets from the
United States and other impe-
a source of handsome profits for
stand that the apartheid system is
al that is why
the government of these pillars of
rialist monopolies. That is why
the apartheid system in South
Africa serves as an outpost to
provide the United States with a re-
sible outpost to control the sea
and the Atlantic, a vital link to
India and the Middle East. Numerous
companies within
the United States and Britain,
to a tremendous
amount invested in maintaining
other African countries in the re-
ion. Numerous companies with-
in the United States and Britain,
to have a tremendous
mass action will our concerns be
heard strongly and also serve to
solidify the efforts of the South
African freedom fighters.

Therefore, let us clearly under-
stand that the apartheid system is
a source of handsome profits for
the United States and other impe-
rator monopolies. That is why
the government of these pillars of
"democracy and freedom" cares
this racist beast with such loving
tender. And let us also un-
derstand that despite all of South
Africa's armed might, despite all
of the backing it gets from the
Rengs and Thatchers of this
world, South African apartheid is
headed for collapse. The waves
of revolts among the people are
building up stronger and stron-
ger. Despite the prison-like condi-
tions under which it survives, the
South African workers are build-
ing up their own organizations
and are beginning to flex their
powerful limbs. It is only a mat-
ter of time before the working
class and the downtrodden peo-
ple of South Africa rise to their
feet and smash the racist minor-
ity regime.

Let us join in solidarity with
the courageous South African
workers and youth in their strug-
gle for the total destruction of
apartheid and minority rule. Let
us also not be content with the
reformist efforts of the United
States State Department, along
with Ford, General Motors and
others who make big profits from
apartheid, in their cheap attempt
to paint up the white minority
rule with a light dressing of cos-
ic changes. Only through
mass action will our concerns be
heard strongly and also serve to
solidify the efforts of the South
African freedom fighters.
