Take a look at Digital's affordable Rainbow 100 personal computer and find out exactly what a personal computer can do for you.

The Rainbow 100 runs over 1,300 8-bit and 16-bit software packages. Everything from text processing, graphics and communications to computer games. From TK! Solver to Zork I through Zork III. And programming languages like BASIC and C, just to name a few.

So look over the Rainbow. For more information on pricing, call Elaine Danforth or Donald Heller at 3-8388.

Substantial discounts available for student purchase.
