World

Weather slows radioactive cargo clean-up — Of the original 46 containers of uranium hexafluoride, 17 are still trapped in a French freighter that sank three weeks ago off the coast of Belgium. A strong wind and five-foot waves have halted progress in salvage efforts.

Pope concerned over unemployment — Pope John Paul II, in his visit to Canada, expressed concern over that nation's 11 percent unemployment rate.

North Korea to cooperate on flood relief — The North Koreans and South Korean Red Cross will join in flood relief efforts for South Korea. The South Korean government said it could cope with the flood alone but agreed to join in cooperation efforts with the North.

Soviets cut down oil exports to Eastern Europe — The Soviet Union has begun to reduce subsidized oil exports to its allies due to rising costs of production and lower overall output, according to figures from the Brookings Institution.

Local

Education offered as answer to riot friction — State officials have allocated $260,000 for an education program consisting of college and remedial education facilities in Lawrence. The program is aimed at alleviating conditions which fostered two nights of rioting in early August.

Boston high schools scores are up, but so is dropout rate — Despite the Boston's business community promise to hire Boston graduates in exchange for the school system's pledge to bring up basic skills, the dropout rate has not yet improved, hovering around 15 percent.

Weather

Better than sex — Well, almost. No, really, it is supposed to be pretty nice today, with bright sunshine leading up to a pleasant afternoon. The high will be around 70 today, dropping down to around 50 tonight. Tomorrow will be even warmer, reaching the middle 70's, under partly cloudy skies.

REFRESHMENTS WILL BE SERVED.

The Management Information Systems Department of
