Students raise $3000 in aid

By Anaisa Lam

A group of students called the Committee to Assist Non-registers (CAN) has raised $3000 to provide financial help to students who have failed to register for the fall term. President Paul E. Gray '54 said last term that MIT would not re- gister the withheld funds because of the Solomon Amendment provisions on non-enrollees from receive- ing federal aid.

President Gray, however, did act out the possibility of an independent group raising funds to aid non-enrollees.

The group has solicited funds from the faculty and the Class of 1964. It has raised about $1500 from donations from the faculty, and the following benchmarks in its report: EECS should only enter the bottom quarter of the class of 1984, according to Joseph Minato '84, spokesman for the group. The wording of the group's primary objectives allows the funds to be available for both men and women.

"There are women who have not submitted the form stating they don't have to register, be- cause they disagree with its princi- ples," Minato said.

The American Friends Service Committee (AFSC), affiliated with the Quaker Church, is handling the money. The group funds through the New England Yearly Meeting (NEYM), one of its sub-branches, Minato said.

The following data was inad- verse academic interest, who then assign the applicant a scholastic index and a personal rating and enter him into an "ad- missions matrix." The matrices on sophomores in 1985, and cut its report: EECS should only enroll to 270 by 1986. The committee provided its sub-branches, Minato said.

YEAM has solicited funds to aid non-enrollees, who have lost federal aid because they failed to register for the fall. The American Friends Service Committee (AFSC), affiliated with the Quaker Church, is handling the money. The group funds through the New England Yearly Meeting (NEYM), one of its sub-branches, Minato said.

1976, however, enrollment ex- ceeded 240, rising swiftly to 380 last year with "no indication [the trend] will change," he contin- ued.

MIT has developed programs in the School of Management, and the Cognitive Science and Materials Science departments, Minato said. It is not yet an official MIT student group.
