GSC discusses grad housing

(Continued from page 1)
mie housing space for graduate students. Vawter suggested that the GSC Housing and Community Affairs committee look into systems employed by other uni-
versities.

The Institute's housing system has space for under 30 percent of the graduates, so many of the students are forced to find off-
campus housing, Vawter said. She added that this has caused some tension between Cambridge
residents and MIT.

The GSC also raised the issue of the recent National Science Foundation bills to allocate edu-
cational funding. The bills will come before the next session of Congress.

The bills would affect the NSF grants and loans which many MIT students receive.

Berna Polwatc, G is forming a group to study the bills' effect on MIT students and to formu-
late possible GSC responses.

Solano wins party nomination

(Continued from page 1)
Solano won his bid for the Republican nomination for state representative from the 8th Suf-
folk District in Beacon Hill and Back Bay.

"It was only a primary and no one was running against me, so
there wasn't much anticipation or suspense in it," Solano said. "I was just looking to see how many
Republicans would turn out to vote because my name was on the ballot.

"For the future campaign I will have to work on Independents ac-
cording to the results thus far," he said.

SUCCESS

At ROLM, we believe there is no single way

to be successful. Rather, we believe success stems from

the creativity and ambition of the individual.

That's why we're committed to creating an environment

in which motivated people can succeed. The risk

in this approach is high, but the rewards are greater.

ROLM. We create an atmosphere for success.

The rest is up to you.

ELECTRICAL ENGINEERING AND COMPUTER SCIENCE MAJORS:

We'll be on Campus October 30 & 31

At that time, we'll ask you to share the re-

sponsibility for discovering where you best fit
in ROLM. Consider working on one of our

project teams in software areas such as voice

and data communications, distributed data

base management, integrated voice-test ap-
lications, data, voice and network archite-

cure. Explore a team hardware design position in

areas such as digital telephones, voice and
digital switching, or analog, digital and

VLSI design.

Or, you can talk with us about combining
your hardware, software, and customer-ori-
ted experience in the areas of product support,
production, field service or sales engineering.

Headquartered in Santa Clara, California,
ROLM designs, manufactures and markets
digital-controlled business communications
systems, and the most advanced ruggedized
computer systems in the world.

Sign up with your Placement Office for an on-
campus interview, or forward your resume
and letter of interest to Vicky Anderson, Engi-
neering Recruitment, M/S 350, 4900 Old
Torrays Drive, Santa Clara, CA 95054.
Watch for posters announcing our campus
presentations.

We are proud to be an equal opportunity/
affirmative action employer.
