Megatest is a leader in the ATE industry because we are a leader in developing computer technology. Semiconductors companies cannot develop and design the integrated circuitry of the future without tools to test the devices. These test tools must be very powerful super-mini computers with firmware and software that push the limits of existing technology. In the last nine years we have invested in hiring some of the best engineers in the world to help us push these limits. The results have been tremendous: sales doubling almost every two years, sales offices around the world and the US, growth from a two-man operation in 1975 to over 450 people in 1984.

But we have not forgotten the key to our success: talented people. Megatest believes excellence will grow at a company that values trust and friendship as an operating philosophy. We promote this philosophy by keeping company decisions in the open not in the board room, by keeping engineering teams small, and rewarding results over form. We firmly believe office politics and status symbols are counterproductive to our goals.

If you believe as we do, that your job should be exciting and fun, watch for future Megatest ads that will describe in more detail about our jobs for college graduates. Or you may want to go down to your placement center and ask to see our company literature and video. If you still don’t have enough information write:

MEGATEST CORPORATION
HUMAN RESOURCES
880 FOX LANE
SAN JOSE, CA 95131
We will be glad to answer your questions. If you think you might be interested in working at Megatest please remember to sign-up for interviews. We will visit your campus on November 8-9. Good Luck!
