Announcements

Notice to certain members of the class of 1985 and 1986: To avoid misunderstandings or complications which might result if your degree were to be conferred to you prior to your final year of studies, please file a Humanities, Arts, and Social Sciences Concentration Proposal form with your advisor and your college office after discussing your program of study with a Field Advisor. This should have been taken care of before the end of your sophomore year. If you have any questions please call the HASS Information Center, 51-4441.

The National Research Council announces the FRG Postdoctoral, Resident, and Cooperative Search Association Programs for research in the sciences and engineering to be conducted in behalf of 21 federal agencies or research institutions. Approximately 250 full-time associations will be awarded on a competitive basis for research in chemistry, engineering, and mathematics, and in the earth, environmental, physical, space, and life sciences. Most of the programs are open to both US and non-US nationals, and to both recent Ph.D. holders and senior investigators. Awards are made for one or two years with stipends beginning at $23,500 a year for Ph.D.'s and an individual allowance for senior associates. Postmark deadline must be no later than January 15, 1985. Information on specific research opportunities and federal laboratories, as well as application materials, may be obtained from Association Programs, Office of Scientific and Engineering Personnel, JH 608-D3, National Research Council, 2101 Constitution Avenue, N.W., Washington, D.C. 20418, (202) 334-2760.

The National Research Council plans to award approximately 35 Postdoctoral Fellowships for minority undergraduate students to work as research associates on 21 current National Research Council projects. Assignments may be made at any time within the current academic year. Fellowship awards are for nine months with an extension of one month. Postmark deadline must be no later than January 15, 1985. Information on specific research opportunities and federal laboratories, as well as application materials, may be obtained from Association Programs, Office of Scientific and Engineering Personnel, JH 608-D3, National Research Council, 2101 Constitution Avenue, N.W., Washington, D.C. 20418, (202) 334-2760.

The American Institute of Steel Construction has announced that eight graduate fellowships of $5,000 each will be awarded in 1985 by the AISC Education Foundation. The grants will be awarded to graduate civil or architectural engineering students proposing a course of study toward an advanced degree related to fabricated structural steel. Applicants must be U.S. citizens. Deadline for receiving applications is March 1, 1985. To obtain applications, write AISC Education Foundation, 400 N. Michigan Ave., Chicago, IL 60611, or call 312-670-2400.

All students interested in applying to law school for fall '85 should make an appointment in the Preprofessional Advising Office. Phone Ann at x3-4737 or stop by Room 12-170.

The Christian Science Monitor is sponsoring an essay contest challenging its readers to come up with possible scenarios that could lead to world peace in the next 25 years. Students and faculty at colleges and universities around the country are also invited to participate. Participants must consider such factors as economic conditions, the role of moral leadership and world armaments. Essays will be judged on the feasibility of the ideas they contain and will be expected to show a knowledge of the framework of international relations in the world today and the process by which those relations are bet-

The Preprofessional Advising Office is responsible for all students interested in and program administration concerning application materials. Essays will be judged on the feasibility of the ideas they contain and will be expected to show a knowledge of the framework of international relations in the world today and the process by which those relations are bet-

The New MIT Music Monitors

Music for MIT Students, Faculty, and Staff.

Much of our lives revolves around music. We listen to it, dance to it, even exercise to it. For the past decade, Bose has brought the excitement of live performances into homes around the world.

It all began with a 12-year research program in acoustics at MIT under the direction of Dr. Bose. This led to the formation of Bose Corporation. And, four years later, to the design of the 901 Direct/Reflecting® speaker system—now the most highly reviewed speaker, regardless of size or price.

The founders of Bose, all from the field of science, decided that Bose would reinvest 100 percent of its earnings back into the corporation to maintain the research that was responsible for the birth of the 901 loudspeaker. This has resulted in a complete line of speakers suited for every listening taste and every budget.

And now, the company which owes its origin to university research is proud to bring the products of this research directly to the university community.

Through a unique program, our complete line of stereo speakers is available to students, faculty, and staff directly from Bose.

It's well known that the loudspeaker, more than any other component, determines the quality of music you hear from your stereo system. So whether you're buying your first system or upgrading your present one, the path to better sound is through better loudspeakers.

Your student representative will be happy to give you full details of the program and lend you a pair of Bose speakers so that you can hear the difference in your own listening room.

Let's hear from you. We like talking to people who enjoy music.

MIT Student Representative:
Vanu Bose 225-6670
