Your foreign language ability is valuable!

Linguistic Systems, Inc., 116 Bishop Allen Drive, Cambridge, MA 02139

IDENTIFICATION and SECURITY SYSTEMS (ISS) has immediate openings for two persons with strong image processing backgrounds. Their initial project will include the development and implementation of automated feature extraction and image analysis algorithms.

ISS offers positions with:

- Technical challenge and responsibility
- High salary and comprehensive fringe benefits
- Substantial employee equity through a stock option plan
- A congenial and professional work environment

Requirements for employment include:

- A Doctorate (or completion of requirements) in Electrical Engineering, or other related field with specialization in image processing
- A Masters and relevant experience.

Knowledge of structured programming and the "C" language is desirable.

If you would like additional information, please contact:

Identification and Security Systems
PO Box 3906
Stuyvesant Plaza
Albany, New York 12203

or contact your office of Career Planning and Placement. We will be interviewing on campus on Thursday, December 6, 1984.
