To the Editor:

The recent break-in at the GAMIT lounge shows that all members of the MIT community must work to reduce intolerance and bigotry on campus. The effects of the break-in go beyond theft, damage to property, and the loss of irreplaceable historical records. This incident damaged the atmosphere of respect, consideration, and judgment that one expects to find at MIT.

We are disappointed to find that MIT under the legal drinking age of twenty-one. For information call 253-6294.

THE PROFESIONAL ALTERNATIVES
