ON THE FRONT LINE...

Dr. Margaret Hostetter
Pediatrician
University of Minnesota

A March of Dimes research grantee, Dr. Hostetter wants to know how the human body defends itself against common bacteria. She will use this knowledge to stimulate a baby's own immune system to fight off infection—all part of the March of Dimes ongoing fight against birth defects.

There's Always Space for the New Expressionist.

At TRW's Electronics and Defense Sector, we recognize the value of new ideas. We provide an environment with space for free thought and expression. To us, you are tomorrow's source of talent and creative energy. With us, you can reach deep into the expanses of your imagination and help to develop technologies that literally reach beyond the stars.

Our informal and encouraging atmosphere has produced a galaxy of opportunities—encompassing large software computer systems, communications and scientific spacecraft, alternative energy sources, high energy lasers, and microelectronics development. These opportunities are open to you.

Take advantage of this opportunity to shape your future and ours... join a company that gladly makes space for the new expressionist. Tomorrow is taking shape at a company called TRW.

Equal Opportunity Employer
U.S. Citizenship Required
On-campus interviews 2/21, 2/22
See your placement office for details.

By Geoff Baskir

I've got a killer mechanics problem set... where's Ed?

He's locked in his room with his headphones on, listening to Laurie Anderson's 'United States' album.

Is he going to be out anytime soon?

I hope so... he's been in there since Thursday.
