The creation of a new national resource

We are in the throes of research and technology company. Bell Communications Research. Our order is to promote the Bell Operating Companies with the kind of expert technical knowledge they need to run and update their businesses.

We are owned by seven of the largest telecommunications firms in the United States. The Regional Bell Operating Companies, and were originally founded as the General Services Administration. Recently we changed the temporary name to Bell Communications Research, a name we think symbolizes tradition, function and purpose. We are providing the Bell Operating Companies with information systems, systems engineering, network planning services, product specifications.

Our professional technical staff alone numbers 4,000 plus, and we use state-of-the-art technology and energy to join this new national resource which is destined to become a world leader in a communications research.

The people who join us now in this unique venture can expect to participate in the research and development of the following areas:

- Design and development of large scale on-line database systems
- Communication and network design
- Product design and product development
- Software research and development
- Software quality assurance systems
- Software standards

Other professionals with backgrounds in one of these areas:

- Human factors engineering
- Econometrics
- Operations research
- Statistics
- Physics

If you're looking for a dynamic environment where you can make things happen, please join our recruiters at the Career Reception. You might also meet some of our recruiters who will be on campus February 25. Alternatively, send your resume detailing your research background and experience, to Manager, Technical Employment, Bell Communications Research, Bell Laboratories, Building R3, Room 48-217, 700 Mountain Avenue, Piscataway, New Jersey 08854.
