uninspired, hanging, drifting, video-games, crime, but in the end, he shot four boys, two in the back. I still want to judge. I've watched too many commercials and traded my compassion for thirty-second emotions. Some hope a teenager will die because he symbolizes terrorism. Others want Goetz to run for mayor.
We live in an age of expanded electronic communications. Almost all our television, motion picture, newspapers, and video games cannot hide this fact: we haven't left the Wild West. We try to outgun each other with empty opinions. They are empty because no one wants to understand the other.

(Continued from page 4)

ministered are drooping like flies. There is a logical reason why each has left or is about to leave. There is also a logical reason why each won't be replaced by a brother or sister. The logic is this -- we are all

It's easy. It feels good. (We were taught that you had to work very hard; that you had the same dollar as my generation. It's logical, So say the psychologists.

SUCCESS

At ROLM, we believe there is no single way to be successful. Rather, we believe success stems from the creativity and ambition of the individual. That's why we're committed to creating an environment in which motivated people can succeed. The risk in this approach is high, but the rewards are greater.
ROLM. We create an atmosphere for success.
The rest is up to you.

ELECTRICAL ENGINEERING AND COMPUTER SCIENCE MAJORS:
We'll be on Campus February 28 & March 1

At that time, we'll ask you to share the re-
ponsibility for discovering where you best fit in ROLM. Consider working on one of our project teams in software areas such as voice and data communications, distributed data base management, integrated voice-test applications, data, voice and network architec-
ture, or Ada.

Explore a team hardware design position in areas such as digital telephones, voice and data communications, local area networks packet-switching, or analog, digital and VLSI design.

Or, you can talk with us about combining your software, hardware, and customer-rel-
ed skills in the areas of product support, production, field service or sales engineering.

Headquartered in Santa Clara, California, ROLM designs, manufactures and markets computer-controlled business communications systems, and the most advanced rugged environment computer systems in the world.

Sign up with your Placement Office for an on-campus interview, or forward your resume and letter of interest to Vicky Anderson, Engi-
neering Recruitment, M/S 350, 4900 Old Ironsides Drive, Santa Clara, CA 95054.

For posters announcing our campus presentations.

We are proud to be an equal opportunity/ affirmative action employer.
