opinion

A look at pornography, Goetz and other issues

To the Editor:

It has recently come to my attention that I seem to have failed my degree requirements. This stems from the fact that I can write a "Dear The Tech" letter with the wisdom of an on-alumna. (It also earns that I've joined the ranks of the unemployed, but we won't talk about that.)

But let's get right into the meat of controversy. Starting with my perennial favorite: sex swapping. Just the Undergraduate Association. The coma hasn't hit yet, I guess, because the UA is just as brain-dead as the late General Assembly.

I think about it for a minute and the undergraduate population. My twin really needs a government. (The UA is a jolly club for bored people who are still in the play of mind. Rather than having these people sowing around, thinking that they sit a sort of power, you undergraduates have a unique opportunity.)

There are two real teams running for UAP this year. Shades of Carthy? There's a chance that they'll split the normal 60 percent of the vote, leaving 40 percent free... Stove and Cat! But they have a real chance to kill the UA this time!

Next topic: Bernard Goetz. I don't know anything about him except what I read in the newspaper, and I don't trust the newspaper. What I do know about is Dr. Brown. I read about it in the newspaper. Objectivism is the philosophy that if you make a serious decision about something, then you should write 4000 words of prose so thick that nobody can get through it even with a stecher, and publish it somewhere. It should be authoritative, self-referential, and continued on the back page. It's too bad that it's going to for (or if), because it is all of this flaming out of the tech.

Nobody has countered Mr. Fluker's letter ("Problems stem from Greece letters,") Feb. 26.) for me, but I'd be happy to pay for a 10 cent case, and the twenty "modest" bowls that you can buy at the corner drugstore just aren't as good as a genuine industrial milk crate. And besides, Kate Simon, my favorite orange color, along with French blue. And they only gave me a to a box.

Birches were always such a phallic symbol in elementary school. Speaking of sex (nude transition; it's the anti-pornography polemics that are very numerous in "The Opening of Marie London." Only 25 people, go, it'll be a lot more that attended the film, I think of that. The reply was "Well, don't go to the movies!" Now the complaint is, "Men see porno films and then harass women. It's documented!" Well, I really saw some of the documentation. It was just as I thought: a couple of police officers admitted that they had been driven to by porno films. Did you expect that they'd try to full credit for a felony? Of course not! They tried to put the blame somewhere else! ("I didn't want to post the problem set, but the video game wasted my time!")

What happened to "majority rule and minority rights? A lot of people seem to be pushing for "morality" rule and the majority vote. (Guess who, Shirley!) Nobody should be able to still others just because they want to impose their squalid attitudes about sex on everybody else. Listen, I've spoken with a small group of people who have actually had sex and the consensus is that it's good!

Now get off our case! Jean-Joseph Coste '83

Microsoft Will Be On Campus March 21, 1985 To Interview Exceptional Systems Design Programmers

Microsoft Corporation develops the leading edge in microcomputer systems software. Our BASIC is world renowned. Our XENIX and MS-DOS operating systems have computer companies and others chomping at the bit. We design state-of-the-art systems software.

We are currently working on Operating Systems, Compiler (FORTRAN, COBOL, Pascal, BASIC, C), Data Base Management Systems, Word Processing, Interactive Systems, Graphics and more.

Our OEM customer base is who's who of the hardware business (IBM, Apple, Radio Shack, Intel, Tektronix). As new systems like the IBM PC and new processors, like the 68000 are developed, Microsoft's programmers get their hands on the machines before they go into production. So your hardware specifications and software innovations during R&D become part of the computers of the future.

Microsoft provides the best systems programming work environment:

• all the high-level hardware (DEC-20, PDP 11, VAX, SUN 68000 machines) and software development tools you need, in a
• small company with lots of interaction and sharing of ideas and methods where
• you can develop your full potential.

And to make a good thing better, Microsoft is located in the Great Pacific Northwest with:

• mountains, skiing, ocean, desert, rain forest, rivers and lakes all within easy reach
• major cultural sports, social and commercial activities fifteen minutes away in Seattle.

We are looking for exceptionally skilled software design programmers—those with intelligence, drive, and a commitment to excellence. We want programmers who will create Microsoft High Performance Software. Microsoft offers an excellent compensation and benefits package. Jo Ann Rahal, Technical Recruiter, Dept. WZ MICROSOFT CORPORATION, 10700 Northrup Way, Box 97200, Bellevue, Washington 98009. We are an equal opportunity employer.

We will be interviewing on campus Thursday, March 21, 1985. Please contact your career placement office for schedule information.
