opinion

We must halt interventionism

(Continued from page 4)

The United States has a direct stake in the resolution of the Nicaragua case regarding US mining of Nicaraguan territory, which has been done without the consent of the World Court, which has ruled it illegal. The United States may be held accountable for the resulting violations of human rights. The World Court's decision, which has been upheld by the International Court of Justice, is a clear example of the importance of international law. The United States has a responsibility to abide by its obligations under international law.
