A Positive Point About Breast Cancer.

Now we can see it before you can feel it. When it's no bigger than the dot on this page.

And when it's 90% curable. With the best chance of saving the breast.

The trick is catching it early. And that's exactly what a mammogram can do.

A mammogram is a simple x-ray that's simply the best news yet for detecting breast cancer. And saving lives.

If you're over 35, ask your doctor about mammography.

Give yourself the chance of a lifetime.

Cancer is often curable.
The fear of cancer is often fatal.

If you're afraid of cancer, you're not alone. But some people are so afraid that they won't go to the doctor when they suspect something's wrong.

They're afraid the doctor might find something wrong. This kind of fear can prevent them from discovering cancer at the early stages when it is most often curable.

Those people run the risk of letting cancer cause them to death.
