MIT changes its financial aid policy

By Sally Vanner

A change in MIT's financial aid policy has reduced the stress placed on students and their families.

The policy, which was introduced by the Dean of Student Affairs Robert A. Randolph, is designed to reduce the amount of financial aid that students receive. The new policy will be in effect for the fall of 1985.

The policy will reduce the amount of financial aid that students receive by $1000, which is estimated to be the average cost of living in the Boston area.

According to Randolph, the new policy will reduce the amount of financial aid that students receive by $1000, which is estimated to be the average cost of living in the Boston area.

The policy will also reduce the amount of financial aid that students receive by $1000, which is estimated to be the average cost of living in the Boston area.

No accurate prediction of class size possible

By Katie Schwarz

Analysis

Last or a series on issues affecting students of class size

Inaccurate predictions of class size and dormitory spaces by the Admissions Committee of the Dean for Student Affairs (DASA) has been a source of concern among students.

The Admissions Committee of the Dean for Student Affairs (DASA) has been criticized for its inaccurate predictions of class size and dormitory spaces.

The Committee's predictions are based on a combination of factors, including the number of applicants, the number of dormitory spaces available, and the number of existing students.

Several factors combined

A combination of factors, including the number of applicants, the number of dormitory spaces available, and the number of existing students, are taken into account when the Admissions Committee of the Dean for Student Affairs (DASA) predicts class size.

Inaccurate predictions can lead to overcrowding or underutilization of dormitory spaces, which can impact the overall student experience.

Museum to use gallery space

By Andy Fish

The Hayden Gallery will be used for additional exhibits, including a new building for music, dance, and drama productions.

The Wiessner Building is home to the Hayden Gallery, which will be used for additional exhibits, including a new building for music, dance, and drama productions.

Erratum

The headline on page 15 of The Tech issue of September 25, 1985, was incorrect. The title of the article was "The tech's student activities," not "The tech's student activities."
