Daimler didn't need to invent the wheel. Wheels were around already. All he did was make the first practical internal combustion engine, put wheels under it, and change the way people get from place to place.

United Technologies could use a Daimler or two. We need some people who can take what we already have — aircraft engines, helicopters, air conditioning, elevators, silicon wafers, and so on — and teach them some different tricks.

You have the kind of training we need. If you also have the kind of inventive vision, perseverance, and talent that may someday make you a household word, you're what we're looking for. And we're what you're looking for. A worldwide group of companies where 25,000 engineers already work, and there's nothing in the entire galaxy to limit how far you can grow.

Find us at the campus placement office. Or write for more information and a reprint of this ad to United Technologies, P.O. Box 1379, Hartford, CT 06143.
