Lincoln Labs pivotal in SDI high technology

(Continued from page 1)

Morrow thought it unlikely that Lincoln Laboratory would diversify from MIT. "It is off-campus near Hanscom Field Air Force Base, and the fundamental research performed produces no operational systems, he said. There is also no pressure from the Pentagon for Lincoln to diversify, Morrow added."

Most of the MIT faculty members conducting research at Lincoln are involved with unclassified projects, although some do consult in classified areas, he said. All of the approximately 30 graduate students there each year are unclassified; he said. Between 60 and 80 students also perform unclassified work during the summer through various special programs.

Foreign students may not work at Lincoln, however. "A committee established by the provost recommended that once foreign students are on campus, they can participate in any program. This does not apply to Lincoln Lab," said Kenneth A. Smith, associate provost and vice-president for research.

Lincoln has special facilities not available on the MIT campus, despite this, "there is no reason to duplicate the same facilities on campus," Morrow said.

Don Hejna '89 and Kyle Peltonen '89 round the marker Sunday in the 1985 Freshman Regatta. Competitors from 12 colleges participated, and MIT finished 8th.

The most interesting jobs in the world are four miles west of here.

If you like Cambridge, you're going to love Bolt Beranek and Newman (or "BBN" as we're better known). We're one of the world's leading centers for research and development in parallel processing architecture and programming, expert systems, speech processing, architectural and underwater acoustics, natural language interface, and basic and applied artificial intelligence. And, we do more than R&D. We're a market leader in packet switch data communications; we've built some of the most sophisticated data networks in the world for companies like Wang and MCI.

We've developed a software package for scientific and engineering research that's unmatched in the industry (it's called RS/1, and it's used in Project Athena).

We'd like to introduce ourselves, show you around, and let you talk to some of the MIT grads who have made the move from Kendall Square to Fresh Pond Circle. If your major is in electrical engineering, physical or computer sciences, it's an opportunity you shouldn't miss.

Visit BBN
October 25, 1985
Open House for MIT Students

Time: 3:00-5:30 p.m.
Transportation: 2:30 p.m. pickup in front of the Administration Building Main Entrance on Main Ave. (Bus transportation provided by BBN)
Location: 70 Fawcett Street, Cambridge, MA
Signup: Office of Career Planning and Placement by Wednesday, October 23

For more information call Christine Lanciaone at BBN, 497-3388
