The faculty is happy to have more students, and the department will make sure it has adequate facilities for upperclassmen's laboratory requirements, he added. "When the time comes, we'll be ready."

The only department to show a significant decline in enrollment was Chemistry. Twenty-two sophomores, compared to 43 sophomores last year, chose to major in Chemistry. Approximately 40 sophomores per class have declared chemistry as their major over the past several years.

"The faculty in the department would like to return to the higher enrollment level because "that's the number we can handle most efficiently," said Melinda Glidden, coordinator of the undergraduate chemistry program. The department has changed the format of freshman chemistry classes in an effort to be "more accommodating," and is offering a seminar series, she said.

There are only half as many undesignated sophomores this year as last year, although the class size is almost exactly the same.

Enrollment in the School of Humanities and Social Science grew slightly; its most popular departments are Economics and Psychology. Enrollments in the Sloan School of Management and the School of Architecture and Planning decreased slightly.

Majors reported (Continued from page 1)

The School of Architecture and Planning decreased, and the School of Architecture and Planning decreased. Its class size is almost exactly the same as last year, although the number of sophomores last year, chose to major in Chemistry.
