Report proposes new course

"There has to be somebody, probably Dean [of Undergraduate Education Margaret L. A.] MacVicar, with primary responsibility for monitoring the curriculum situation and minimizing overlaps," said committee member Merritt Roe Smith, professor of science, technology and society.

The committee insisted that this supervisor receive a budget adequate for providing released time or summer salaries so that faculty members, particularly junior professors, could afford to invest time in developing new courses.

Several details which must still be worked out within the proposal include accurately defining teaching loads, with particular concern for subjects which are taught by more than one professor, and ensuring accuracy in the assignments.

The policy did not adequately take everyone's concerns into consideration. Barbara M. Fieneam, campus activities adviser, agreed, "It is good to have a policy so it can be used when the need arises," she said.

Students' concerns will be relayed to the executive committees of the UA and GSC at a joint meeting to be held in the next few weeks. When the draft has been approved by the councils of both groups, it will be submitted to Dean for Student Affairs Shirley M. McBay.

The MIT policy on sexually explicit films "is a commitment the university has made," said committee chairman Lynn M. McBay.

"A program like this is going to require a lot of work by the faculty," Lippard stated. "If success will depend on whether the university will be willing to do the work and permit the diversion from their local research.

Maier suggested that the faculty would probably be open to an innovative program of this sort if some form of central administrative control were established in the new system.
