Strehle becomes MIT vice president

By Heather M. Huber

Glenn P. Strehle, 58, was named MIT's first vice president for resource development effective March 1. Strehle, a trustee of the Board of Trustee of MIT Corporation since 1973 and will continue to hold his current position on the board.

Sstrele succeeds Professor Gerald M. Edelman, who will be returning to teaching and research, as director of the Department of Applied Biological Sciences. Resource development involves fundraising, solicitation, and gift handling, Strehle explained. Before being named vice president, Strehle spent approximately 25 percent of his time on resource development; as vice president, he will now devote approximately 75 percent of his time to that activity.

His responsibilities will also include directing the Institute's development program. Strehle has promoted Allan S. Bufton to senior vice president to assist him in his duties as treasurer.

Strehle said he decided to accept the position of vice president because he is dedicated to resource development and believes he can make a contribution. He is currently responsible for MIT's five endowed funds, six endowments, and one resource development effective March 1. Strehle, a trustee of the Board of Trustee of MIT Corporation since 1973 and will continue to hold his current position on the board.
