THE SOLUTION

The problems we face today, both at the societal and individual levels, are truly awesome. At the national and international levels, the issues include human rights, nuclear escalation and poverty. At the individual level, people are searching for identity, self-worth, acceptance and love. We believe all of these problems are the result of man's sinful nature which separates him from God. We believe the solution to man's sinful nature is Jesus Christ. And we are able to talk to individuals about The Solution.
