By Andrew L. Fish

"IAP [Independent Activities Period] is going to be totally restructured," Undergraduate Assembly (UA) President Bryan R. Moser '87 said at a meeting of the pos-
sion of the Department of Elec-
tronics and Computer Science (EECS) to offer Structure and Interpretation of Computer Programs (6.001) during IAP. EECS proposed that at some time in the future, grading system would be offered over the summer term. The course would then not be offered during the academic year.

About 30 students, administrators, and staff members attended the meeting, which was open to the public. Many participants were concerned that large numbers of freshmen would enroll in the IAP offering. Last year 40 students completed the course, 316 during the entire term.

"IAP is the first time [fresh-
men] have a chance to get out of the pressure," a student observed.

"MIT wants freshmen to keep from killing themselves," another student added. "We're trying very hard this summer to retain freshmen, he added."

Women's Rush

In a departure from last year, the two non-residential sororities, Alpha Phi and Alpha Chi Ome-

gamma, will be permitted to begin the two non-residential sororities, letters and prospective bulletins said.

scores, but class rank and grade test scores, like SATs," Behnke said. "Class of 1990 was different than,encies in judging applications.

Lash did not think that the provost had "the luxury" of limiting Alpha Phi's rush last year, "very disturbing."

She noted that women could be turned away because of a lack of space," Lash said.

"We're trying for a place to live. "It could be confusing for them," the said.

"I'm worried about the proce-
dings of this [new] system," said another student. "We're going to have more people to apply, it's essen-
tial for more of the faculty and administrative staff to read and evalu-
ate applications," he added.

The intended majors of the class have changed in comparison to past years, Behnke said. Fewer applicants expressed an interest in electrical engineering and computer science this year compared to past years. Some students will be under review for the first time.

"Any company could do a good job for MIT," said another student. "I think it would be good for society as a whole," he added.

Sororities will begin rush on Friday

and MacGregor House is getting its third Rush Chairman in five years.

"We both believe in creating a situation where people can be themselves," he said, explaining that Bexley is a good place for personal growth. He hopes to make Bexley in the form in which it is now, "a nice community" which he attributes to the traditions and Brothers and Sisters residing.
