**Residence book misleading**

By Mark Kantrowitz

How can the dean's office expect freshmen to make a sensible decision about housing if they are not given true information? The Residence Book describes the options available and the specific criteria that will need to be met in order to live in the residence halls. The book details the rules and regulations that will govern residence hall life for the upcoming year.

The book begins by describing the various types of housing available, including dormitories, upperclassman housing, and graduate student housing. It then goes on to explain the criteria for selecting a residence hall, including factors such as proximity to classes, costs, and amenities.

However, the book fails to mention the most important factor: the availability of housing. Many freshmen will find that the book fails to mention the fact that some residence halls are already at full capacity. This means that even if freshmen meet the criteria for selecting a residence hall, they may still be unable to live in their preferred hall.

For example, the book fails to mention that the upperclassman housing available is already at full capacity. This means that freshmen who meet the criteria for selecting upperclassman housing may still be unable to live in their preferred hall.

In addition, the book fails to mention the fact that some residence halls are already at full capacity. This means that freshmen who meet the criteria for selecting a residence hall may still be unable to live in their preferred hall.

The book also fails to mention the fact that some residence halls are already at full capacity. This means that freshmen who meet the criteria for selecting a residence hall may still be unable to live in their preferred hall.

In summary, the Residence Book fails to provide true information about the availability of housing. This means that freshmen will not be able to make a sensible decision about housing if they are not given true information.
