How to build a better world.

Allow us to suggest three ways. MacDraft™ MacDraw™ and MacPaint™.

The combination of these programs, along with a Macintosh™ computer, will give architectural students unlimited freedom to create. Whether it be for drawing buildings, designing urban landscapes, or drafting engineering and construction plans.

This is just one example of how Macintosh helps students work smarter, quicker and more creatively. And the beauty of Macintosh is, you don’t have to know diddle about computers to use one.

So get a Macintosh. The world will be a better place for it.
